

Scientific Communications & Prospecting

Median Technologies processes personal data for the following purposes:

- Communication, as part of its legitimate interest in informing its partners about institutional and scientific news related to the Company;
- Commercial prospecting, as part of its legitimate interest in developing its business.

Your data may have been sourced from various websites, public databases, or journals where scientific publications are shared and may include the following elements:

- Identity (first name, last name);
- Email address;
- Job title;
- Affiliated medical or scientific entity.

The data is intended for internal use. Our technical service providers also have access to your data, strictly within the scope of their responsibilities.

For institutional communications we send you, your data will be retained as long as you do not object to receiving them.

For prospecting activities, your data will be retained by Median Technologies for a period of 3 years from the last contact initiated by you or until you object to receiving them.

To express your objection to institutional communications and/or commercial prospecting, please use the unsubscribe links included in the dedicated emails or inform us via the addresses below.

In accordance with the French Data Protection Act of January 6, 1978, as amended, and the European Regulation 2016/679 of April 27, 2016 on the protection of individuals with regard to the processing of personal data, you have the right to access and rectify your information, as well as the right to object, restrict processing, and request erasure within the limits permitted by the European Regulation.

You can exercise these rights:

- By mail at Median Technologies, Legal Department, Les Deux Arcs, 1800 Route des Crêtes Bâtiment B, 06560 Valbonne
- By email at dataprotection@mediantechnologies.com

Median Technologies reserves the right to ask you to confirm your identity by providing proof.

If, after contacting us, you believe that your data protection rights have not been respected, you may file a complaint with the CNIL.

For your information, Median Technologies has appointed a Data Protection Officer, who can be reached at the email address dpo.median@anaxia-conseil.fr.
